## *Project*

---

**Scammer.vn:** website search engines help you check information to avoid being scammed on social networking sites like Facebook and Zalo by asking victims to submit information about scammers, like their phone numbers, bank account numbers, etc. (alternative: scamvn.com)

*Prize: 3rd prize Science and Technology Ho Chi Minh Competition and 3rd prize IT Competition for Student (Tin hoc tre) (2019)*

**10th Grade Enrollment System:** an admission website for a high school in Ho Chi Minh City makes registration for 10th grade faster, and safer for students (due to COVID-19). By reducing the quantity of paperwork, schools had handle over 1,000 students application within a day with fewer staff.

*This product being use in Gia Dinh High School HCMC since 2019.*

**Smart CCTV:** a software and hardware that integrate into camera systems to detect theft and sending alert to owner through smallphone, Smart CCTV using YOLO (OpenCV) and Meanshift Algorithmn.

*Prize: 2nd prize at Science and Technology Ho Chi Minh Competition and 2nd at IT Competition for Student (Tin hoc tre) (2020).*
